SERVICE AGREEMENT

The Red Creek Municipal Utility District ("District") agrees to sell and deliver water to the Customer and the Customer agrees to purchase and receive water from the District in accordance with the rules and regulations of the District as included in its Tariff on file with TCEQ, and as amended from time to time.

1. The District will turn on service at the earliest convenience if a tap is already in place. Delays will be encountered when no tap is in place due to engineering time and time necessary to bore and install taps. The desired water meter size is 3/4" x 5/8" unless otherwise specified. The District will inspect all water facilities on the customer's side of the meter and on the customer's side of the tap prior to providing service.

2. All water meters, taps and other facilities installed by the District are for the sole use of the Customer, who shall not transfer service from one property or property owner to another, nor share, sell or sub-meter service to any other person, dwelling, business or any other entity, under penalty of law. Only one (1) residential point of use is permitted per water meter. Customer will not permit anyone except District employees to work on, tamper with or interfere with any of the equipment installed on the Customer's premises.

_____(Initial) *"I understand that according to District water use regulations cited above, and any other rules and regulations that are cited in District policy or in any authoritative governing policy regarding water use, that I, as the signer of this service agreement, am solely responsible for enforcement of these regulations on the property affiliated with this agreement. I am solely responsible for any and all water use, any and all compliance requirements, and have the sole responsibility to monitor the property affiliated with this agreement for usage and compliance. I agree to be responsible for the enforcement of these regulations on the affiliated property and agree to pay any and all water usage billing from the meter assigned to this property."*

3. The District will have the right to locate service facilities on the property of the customer at a point chosen by the District. Customer herein grants to the District, its employees, agents and representatives, and any other entity with whom the District contracts for the inspection, installation, maintenance, repair of its equipment and facilities, a right of way easement across the Customer's property with the right of ingress and egress for the purposes of installing, maintaining, repairing, removing, reinstalling and inspecting the District's, meter, tap, equipment and facilities.

4. Customer will install, at his own expense, a service line from the District meter or tap to the point of use and shall indemnify and hold the District harmless from all claims or damages to real or personal property resulting therefrom or caused thereby. The District will not be responsible for the repair or replacement of any real or personal property within the utility easement or right of way damaged in the process of inspection, installation, repair, maintenance, or removal of any facility of the district. Customer will be responsible for maintenance and repair of the service line. No pipe or pipefitting which contains more than 0.25% lead may be used for the installation or repair of plumbing connections which provides water for human use. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.

5. In the event of a water shortage, the District may restrict usage in any manner deemed equitable with the Board in compliance with Texas law.

6. Customer hereby consents to inspection by the District of all plumbing facilities at the service address at reasonable times to ensure compliance with TCEQ 290.44. Inspections for cross connection, multiple connection, or any other compliance issues can be conducted without notice to customer at any reasonable time (reasonable time is generally accepted as 9am-7pm). Consent to access customer property for compliance inspection is not required.

7. The District assumes no liability for blockage or rupture of the sewer main occurring as a result of acts of third person, acts of God or force majeure and not as the result of acts or commissions of the District.

8. Customer is hereby notified that the theft, conversion, or unauthorized appropriation of water belonging to the District is unlawful and violates the Texas Penal Code. In addition to any penalties provided by the Texas Penal Code, the District may set reasonable civil penalties as provided in Section 49.004 of the Texas Water Code. In the event of a suit to enforce its rules, the District may recover reasonable fees for attorneys, expert witnesses, and other costs incurred by the District. Any expenses associated with the enforcement of this agreement shall be billed to Customer and due within (10) days of the receipt of the bill.

9. If Customer fails to comply with the terms of this Service Agreement, the District shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement will be billed to the Customer and be due ten (10) days after receipt of the bill.

Customer has been shown a copy of the District's tariff as approved by the Texas Commission on Environmental Quality, and agrees to pay the rates in the tariff and abide by the requirements in this Application and Service Agreement.
